## Welcome

As the Chair of the Swansea University Equality Committee, I am pleased to share this year's Equality Annual Report which presents Swansea University's equality monitoring data for the period 2021/2022. During the reporting period we have seen COVID19 restrictions gradually lift in Wales and a planned phased return to campus for many staff and students at Swansea in line with Welsh Government guidance. The year has, nevertheless, still had its challenges for many as we have continued to adapt to our new ways of working. I would like to thank all our colleagues across the University who have worked together during this time to continually progress the equality agenda. A list of these colleagues and who are key contacts in progressing this agenda can be found at the rear of this report.

Whilst we are legally required to publish this report, it's important to note that Swansea University is also fully committed to ensuring fairness and equality for all its staff and students. The content of this report is used to inform the University's priorities for equality, diversity and inclusion (EDI) and an update on the progress made towards our University Strategic Equality Plan(2020-2024) can be found towards the end of this report.

Despite the ever-changing landscape, equality, diversity and inclusivity has remained a key priority for the University as we continue to make progress against our strategic equality objectives.

#### **EMBEDDING EQUALITY IN RECRUITMENT PRACTICES**

We have continued to take action to remove barriers for underrepresented groups in the recruitment process by utilising positive action where appropriate, as a result;

- There has been an increase in the composition of applications from individuals from an ethnic minority background, increasing from 34.3% last year to 38% this year. This is the highest proportion of applications received from ethnic minority applicants since we have been collecting data in this way. Although we are pleased with the number of applications received, we note that there is a gap between the success rate of ethnic minority and white candidates, which we will continue to address.
- The success rate for disabled applicants has increased from 13.3% last year to 17.9% this year and is higher than those who did not state a disability (12.7%).
- The success rate for LGB+ applicants has also increased from 11.2% last year to 14.9% this year. This also remains higher than the success rate of heterosexual applicants which is 12.8% this year.
- The success rate for females has increased from 12.1% last year to 16.1% this year and female candidates remain more successful than male candidates (10.5%).

## PROGRESSING RACE EQUALITY

We have participated in the Race Access and Success Collaborative Project with Advance HE and HEFCW, a Wales-wide enhancement programme designed to help improve race equality in higher education through an innovative series of workshops, action planning sets and consultation. An action plan has been developed and further consultations underway to understand the lived experiences of staff and students from ethnic minority backgrounds.

With 13.1% of our colleagues stating that they are from an ethnic minority background, we continue to surpass the Welsh benchmark at 8.8% (Advance HE Statistical Report 2021). The number of ethnic minority colleagues has increased by 6% over the past 5 years.

This year, for the first time, the subcategories of ethnicities was recorded in order to help us take more targeted action in future.

#### ADDRESSING OUR GENDER PAY GAP

Once again, the University has reinforced its commitment to tackling gender inequality by reporting our gender pay gap data on the gov.uk website. Our current mean average gender pay gap stands at 15.3%, which is a 3.1% decrease since we reported last year and a 5.5% decrease over the past 4 years. This means we have already achieved the target we set ourselves in our <u>University</u> Strategic Equality Plan(2020-2024) to reduce our mean pay gap by 2% by 2024. We will continue to work hard to reduce the gap further.

### **ADVANCING LGBT+ EQUALITY**

Swansea University has increased its ranking from 47th to 26th in the Stonewall Workplace Equality Index, which is our highest ranking to date in the league table of UK employers. We are delighted that we have also increased our rankings in participating Education Sector entrants from 6th to 5th. We have achieved a Gold standard award, which recognises that we have embedded LGBT+ equality into our core areas of work at the highest level. The University and our LGBT+ Staff Network have worked together to make Swansea as accepting as possible during what has been a very difficult period for the LGBTQ+ community, and this improvement in our ranking, and importantly being awarded a Gold level award, shows that we are making a real difference.

As a result, the percentage of our LGB+ colleagues continues to increase, and at 4.5% it continues to remain above the UK benchmark of 3.5% (Advance HE Statistical Report 2021).

## **PERFORMANCE ENABLING**

Once again, we achieved a 99% completion rate for annual Performance Development Reviews (PDRs) in 2021. During a continued unprecedented period of uncertainty and upheaval, we felt it was even more important that all colleagues had the chance to have meaningful conversations about their personal growth, regardless of their background, beliefs, or individual protected characteristics.

Our performance enabling initiatives continue to actively support our colleagues' career progression, particularly our female academics, who have historically been less likely to apply for promotion. There's been a 58% increase in the number of successful female applicants compared to 2015 and our percentage of female Professors has risen from 13% in 2014 to 26% in 2022. This compares to the UK sector benchmark of female professors at 28% (Advance HE Statistical Report 2021).

There's also been a 67% increase in the number of successful ethnic minority applicants at all levels compared to 2015.

### **INCREASING VISIBILITY AT SENIOR LEVEL**

We have continued to monitor our Council Governance structure and as of March 2022, 56% of Council members were female, compared to 25% in 2013. The representation of council members from an ethnic minority background continues

to be representative of the percentage of colleagues from an ethnic minority background within the University.

We are also pleased to report that considerable progress has been made at the University Senior Leadership Team where, for the first time, 50% of members are now female. Work continues in this area to address the representation of members from an ethnic minority background.

Our faculty restructure has enabled the appointment of EDI School and Faculty leads who are tasked with embedding EDI considerations into the day to day functions of their areas.

## **CELEBRATING DIVERSITY**

With the restrictions easing during the reporting period, we were able to adopt a more flexible approach to events held, with some being held online and some being held in person but with an option to attend online.

Amongst the events marked were Holocaust Memorial Day, LGBT+ History Month, International Women's Day, Black History Month as well as a range of interfaith events.

Many of these celebrations and events were organised in close partnership and association with the Students Union and were inclusive of both colleagues and students.

Our Employability Academy (SEA) won the Equality, Diversity, and Inclusivity category at this year's Association of Graduate Careers Advisory Services. The award acknowledged SEA's involvement in RE: Action 24/7 programme which supports the ambitions and aptitudes of those from lower socio-economic backgrounds looking to advance their career.

Our ISS inclusive Services Annual Report highlights the group's activities in the last Academic Year, which include the Living Books Toolkit, which has been effective in building connections and developing understanding in the University Community, and the launch of the Inclusive Practices course.

## **NEXT STEPS**

Although it is important to celebrate our achievements over the past year there are clear areas in which we need to focus our efforts to continue to make progress against our strategic equality objectives.

Most notably, recruitment, retention, and promotion success rates of colleagues from ethnic minority backgrounds remains a key priority. Of particular importance is the need to increase the number of colleagues from ethnic minority backgrounds in senior positions at the University. Work has already begun in this area through the development of a comprehensive race action plan which aims to address these, and other key areas identified through a series of recent consultation exercises with colleagues and students from all ethnic backgrounds on their lived experiences at the University.

We have made significant progress in reducing the gender pay gap, but we must push forward by being proactive and innovative in pursuing activities to reduce the gender pay gap and to encourage more females to apply for senior roles.

Swansea University Senior Leadership Team remains committed to progressing all areas identified above through our Strategic Equality Plan 2020-2024.

			-

## **LEAVERS**

25 and under	24.4%	211
26-30	14.8%	128
31-35	14.5%	125
36-40	9.7%	84
41-45	8.1%	70
46-50	7.2%	62
56-60	6.8%	59
61-65	6.0%	52
51-55	5.7%	49
66+	2.9%	25
Total		865

The highest proportions of leavers are in the 25 and under group. 43% of the 25 and under group held clearing helpline operator and COVID asymptomatic testing fixed-term posts.

There has been an increase in leavers from 798 last year to 865 this year. The numbers of leavers should reduce next year due to COVID asymptomatic testing colleagues (47 staff under 25) not being required by the University.

## TRAINING

Classroom courses pr	ovided	301
CLASSROOM BASEI	TRAINING	
31 - 35	18.3%	644
26 - 30	13.5%	475
36 - 40	13.2%	465

26 - 30	20.6%	1790
31 - 35	20.3%	1 <i>7</i> 61
25 and under	14.9%	1291
36 - 40	12.8%	1109
41 - 45	9.8%	847
46 - 50	7.6%	664
51 - 55	6.5%	567
56 - 60	4.9%	428
61 - 65	2.1%	184
66+	0.5%	40
Total		8681

The number of classroom courses (301) has increased slightly during the reporting period as compared to last year (245) and this can be attributed to a greater number of colleagues returning to campus as Covid-19 restrictions have been lifted.

The age distribution of colleagues accessing classroom-based training is broadly similar.

The number of online training participants has decreased significantly since last year (11514) and this can be partly attributed to an increase in classroom-based courses and partly due to a reduction in newly released mandatory online training such as the Covid-19 online recovery package and criminal finances which were introduced and completed by colleagues during 2020-21.

The age distribution of colleagues accessing online training has significantly increased for age groups 26-30 (20.6%), 31-35 (20.3%) and 25 and under (14.9%) compared to last year's data; 26-30 (13.7%), 31-35 (15.7%) and 25 and under (6.7%).

## **GRIEVANCE AND DISCIPLINARY**

The data for grievance and disciplinary shows the number of cases reported by the protected characteristic of the individual.

## **GRIEVANCE**

31 - 35	50.0%	2
41 - 45	50.0%	2
Total		4
DISCIPLINARY		
41 - 45	28.6%	2
51 - 55	28.6%	2
26 - 30	14.3%	1
31 - 35	14.3%	1
36 - 40	14.3%	1
Total		7

Across the reporting period, 4 grievances were raised, and 7 disciplinary cases were conducted. This is lower than last year, where a total of 9 grievances and 12 disciplinaries were recorded.

Of the grievances, 50% (2) were in the 31-35 age group and 50% (2) were 41-45.

As for the conducted disciplinary cases, 72% of all colleagues were aged between 25 and 40. 28.6% (2) were in the 51-55 age group..

## **Disability**

## **COLLEAGUE COMPOSITION**

Not disabled	87.5%	3423
Disabled	9.3%	362
Prefer not to Say	3.0%	119
Unknown	0.2%	8
Total		3912

9.3% of colleagues stated a disability compared to 7.8% last year, suggesting an increase in confidence in disclosing this information. This is higher than the UK benchmark of 5.5% and Welsh benchmark of 6.7% (Advance HE Statistical Report 2021).

Of colleagues who stated a disability, 26% was for a specific learning difficulty such as dyslexia, dyspraxia etc followed by 20% stated a mental health condition and 17% stated a long-standing illness or health condition.

## **RECRUITMENT**

**APPLICATIONS BY DISABILITY**

Gender identity different	8.0%	9
Total success rate	13.3%	1435

The number of posts advertised, and number of applications have both increased compared to last year (2020-2021). However 2020-2021 saw a period of reduced recruitment due to financial restraints and the Covid 19 Pandemic. Financial restrictions were lifted in 2021-2022 which allowed recruitment to return to pre pandemic levels.

Applicants identifying as the same sex as at birth is comparable to last year (96.8%). Applicants identifying as a different sex to that registered at birth has increased by 0.2% to 1%.

Those preferring not to say increased by 1.6% to 3.1%.

The overall applicant success rate has increased from 10.5% to 13.3%.

In contrast to last year's report, applicants identifying as a different sex to that registered at birth have a lower success rate (8%) within their own group, than those who identify as having the same sex (13.3%). Caution needs to be taken when interpreting percentages as the numbers are low and there has been an increase in 'Prefer Not to Say' responses as compared to last year. Those who chose 'Prefer Not to Say' had a higher success rate this year (9.9%) as compared to last year (7.1%).

## **LEAVERS**

Gender identity same	86.5%	<i>7</i> 48
Prefer not to say	11.2%	97
Unknown	2.0%	17
Gender identity different	0.3%	3
Total		865

86.5% of leavers gender identity is the same as sex registered at birth. 0.3% of leavers gender identity is different to sex registered at birth which is comparable to the pool of colleagues we have (0.3%).

The number of posts advertised, and number of applications have both increased compared to last year (2020-2021). However 2020-2021 saw a period of reduced recruitment due to financial restraints and the Covid-19 Pandemic. Financial restrictions were lifted in 2021-2022 which allowed recruitment to return to pre pandemic levels.

The percentage of applicants who are married, single, co-habiting, divorced, separated, in a civil partnership or widowed is comparable to last year.

The highest proportion of applications received is from those who are single (41.6%), followed by married applicants (34.7%).

The overall applicant success rate has increased from 10.5% to 13.3%.

The success rate for married applicants has increased by 2.3%, from 7% last year to 9.3% this year, and there has been an increase in the success rate by 2.2%, from 4.4% last year to 6.6% this year, for applicants in civil partnerships.

The success rate for applicants who are co-habiting has increased by 8.2%, from 10.7% last year to 18.9% this year, and for widowed applicants the success rate has increased by 7.8%, from 8.3% last year to 16.1% this year. All other categories are comparable.

Total		8681

The number of classroom courses (301) has increased slightly during the reporting period as compared to last year (245) and this can be attributed to a greater number of colleagues returning to campus as Covid-19 restrictions have been lifted.

The percentage of married colleagues (44.7%) who undertook classroom-based training is comparable to last year and proportionate to the pool of married colleagues at the University (46.8%).

The percentage of colleagues in a civil partnership (0.7%) who undertook classroom-based training is comparable to last year (0.6%) and proportionate to the pool of civilly partnered colleagues at the University (0.6%).

The number of online training participants has decreased significantly since last year (11514) and this can be partly attributed to an increase in classroom-based courses and partly due to a reduction in newly released mandatory online training such as the Covid-19 online recovery package and criminal finances which were introduced and completed by colleagues during 2020-21.

The percentage of married colleagues (42.3%) who undertook online training is comparable to last year (43.9%) and proportionate to the pool of married colleagues at the University (46.8%).

The percentage of colleagues in a civil partnership (0.8%) who undertook online training is comparable to last year (0.9%) and proportionate to the pool of civilly partnered colleagues at the University (0.6%).

1100

The composition of our ethnic minority colleagues is slightly higher this year at 13.1% compared to last year's 13%. Our ethnic minority colleagues' composition has grown by 6% over the past 5 years.

The percentage of ethnic minority colleagues at the University, 13.1%, is slightly lower than the UK Benchmark of 15.4%, but is higher than the Welsh Benchmark at 8.8% (Advance HE Statistical Report 2021).

The largest ethnic minority subcategories are Asian (4.2%) and other ethnic group (3.9%). We are above the Welsh benchmark (Advance HE Statistical Report 2021) for each Ethnic Minority subcategory with the exception of black (0.7%) which is slightly lower than the 1.04% Welsh benchmark.

The number of posts advertised, and number of applications have both increased compared to last year (2020-2021). However 2020-2021 saw a period of reduced recruitment due to financial restraints and the Covid-19 Pandemic. Financial restrictions were lifted in 2021-2022 which allowed recruitment to return to pre pandemic levels.

There has been a 3.7% increase in the composition of ethnic minority applications received this year, increasing from 34.3% last year to 38.0% this year. This is the highest proportion of ethnic minority applicants received since we have been collecting data in this way. There have been less applications from white candidates this year decreasing from 61.6% last year to 56% this year.

The overall applicant success rate has increased from 10.5% to 13.3%.

The success rate for both white and ethnic minority groups has increased from last year. However, the gap in the success rate between ethnic minority applicants and white applicants has increased to 10.7% this year, (compared to 8% last year) with 17.7% of white applicants being successful, as compared to 7% of ethnic minority applicants. When we look at the sub category breakdown we can see that all subcategories with the exception of mixed ethnicity colleagues, have a lower success rate than white colleagues.

We have identified this as a priority area and are continuing to focus on conducting further data analysis to take appropriate actions with the aim of reducing this gap.

## **LEAVERS**

White	78.6%	680
Ethnic Minority	17.7%	153
Asian	6.1%	53
Black	3.2%	28
Chinese	3.2%	28
Other ethnic	2.9%	25

Mixed	2.2%	19
Prefer not to say	1.8%	16
Unknown	1.7%	15
Not known	0.1%	1
Total		865

The percentage of ethnic minority leavers (17.7%) is higher compared with last year at 14.3%. It is higher than our overall pool of ethnic minority colleagues at 13.1%.

We can attribute some of this increase to fixed term contracts for Clearing Operators and Covid Asymptomatic Testing staff. We should see a reduction in 2022-2023 as there is no anticipated requirement for Covid Asymptomatic Testing roles.

When we look at the subcategory breakdown we can see that for all subcategories, with the exception of 'other ethnic' colleagues, the proportion of leavers is slightly higher than the corresponding pool of staff at the University.

## TRAINING

Not known	0.3%	22
Unknown	0.2%	15
Total		8681

The number of classroom courses (301) has increased slightly during the reporting period as compared to last year (245) and this can be attributed to a greater number of colleagues returning to campus as Covid-19 restrictions have been lifted.

Of the classroom-based training participants, 14.6% identified as from an ethnic minority background, a slight decrease on last year (by 1.1%) but still higher than the percentage of Ethnic Minority Colleagues in our university pool (13.1%)

When we look at the subcategory breakdown, we can see that for all subcategories the proportion of participants is comparable to the pool of staff at the University.

There was a slight increase in white participants from 80.8% last year to 81.9%. The percentage of colleagues who preferred not to say was comparable to last year.

The number of online training participants has decreased significantly since last year (11514) and this can be partly attributed to an increase in classroom-based courses and partly due to a reduction in newly released mandatory online training such as the Covid-19 online recovery package and criminal finances which were introduced and completed by colleagues during 2020-21.

Of those who completed online training 17.7% identified as from an ethnic minority background, an increase from 15.7% last year and higher than the percentage of ethnic minority colleagues in our university pool.

When we look at the subcategory breakdown, we can see that for all subcategories the proportion of participants is comparable to the pool of staff at the University.

There was a slight decrease in white participants from 84.5% last year to 79.5%.

## **GRIEVANCE AND DISCIPLINARY**

Of the grievances, 75% (3) identified as white and 25% (1) preferred not to say.

As for the conducted disciplinary cases, 14.3 % (1) identified as from an ethnic minority background, 85.7% (6) were White.

# Religion & Belief

## **COLLEAGUE COMPOSITION**

No religion	43.0%	1682
Christian	25.8%	1011
Prefer not to say	24.3%	950
Muslim	2.1%	81
Spiritual	1.7%	65
Hindu	1.0%	40
Any other religion or belief	1.0%	39
Buddhist	0.7%	28
Unknown	0.2%	9
Jewish	0.1%	5
Sikh	0.1%	2
Total		3912

Colleagues stating no religion represent the largest group at Swansea University, 43%. This is followed by those who are Christian 25.8% and prefer not to say, 24.3%. The order of the remaining religions and beliefs remain similar to last year with the exception of Unknown where this has significantly reduced. This has been due to an equality monitoring exercise completed this year, encouraging colleagues to review and update their equality monitoring information.

The group of colleagues who preferred not to share their religion or belief group has decreased slightly, once again, from 26.2% last year to 24.3% this year, suggesting an increase in confidence of disclosing this information.

We have significantly more Christian colleagues, 25.8%, than the UK benchmark of 17.6%. The percentage of Muslim colleagues, 2.1%, is also higher than the UK benchmark of 1.7% (Advance HE Statistical Report 2021).

<sup>1</sup>NHS, GP, and any clinical staff are grouped in the Clinical grade.

The proportion of female colleagues is comparable to the UK benchmark of 54.2%. The proportion of male colleagues has increased by 0.4% and is comparable to the UK benchmark of 45.8% (Advance HE Statistical Report 2021).

Note - information provided in this section refers to number of contracts as opposed to headcount. Grade 8 continues to hold the highest percentage of colleagues for both females 13.9%, and males 9.5%.

More females occupy positions at grades 3,4,5,6,7,8,9,10a and clinical posts than males. More males occupy posts at grade 1,2, 10 and 11.

# Sex

## **CONTRACT TYPE**

55.9% 44.1 %	1005 794 <b>1799</b>	Note – information provided in this section refers to number of contracts as opposed to headcount.  44% of all academic contracts (including clinical, research and tutors) are held by females, which is higher than last year (40.5%).
VICES		
63.9% 36.1%	1436 812	26% of professors are female (as at 31.3.21), an increase of 12% since 2012. This compares to the national HEI UK benchmark of 28% (Advance HE Statistical Report 2021).
	2240	63.9% of professional service contracts are held by females, compared to 36.1% held by males.
51.1% 49.0%	1524 1464 <b>2988</b>	The percentage of full time contracts held by males has reduced from 52.7% to 51.1% and the percentage of full time contracts held by females has increased from 47.3% to 49%.
72.3% 27.7%	766 293 <b>1059</b>	The data shows that significantly more part time contracts are held by females. Of all the contracts held by females, 35% are part time, of all the contracts held by males, 16% are part time.
55.4% 44.6%	1593 1285 2878	Of all contracts held by females, 28.5% are fixed term contracts and of all contracts held by males, 29% are fixed term contracts. These are both lower than last year, 35% and 32% respectively.
	20/0	This is the result of an ongoing focus to review fixed term contracts at the point of renewal and convert to
54.5% 45.5%	63 <i>7</i> 532 <b>1169</b>	permanent contracts where feasible.

## RECRUITMENT

Posts advertised		1100	The number of posts advertised, and number of
APPLICATIONS BY SE	X		applications have both increased compared to last
Male Female Prefer not to say Unknown Other Applications received APPLICANT SUCCESS (WITHIN OWN GROU		5269 5108 253 150 20 <b>10800</b>	year (2020-2021). However 2020-2021 saw a period of reduced recruitment due to financial restraints and the Covid-19 Pandemic. Financial restrictions were lifted in 2021-2022 which allowed recruitment to return to pre pandemic levels.  47.3% of female applications were received, which was 1% higher than last year. 48.8% of male applications were received which was 2.9% lower than last year.
Unknown Female	24.0% 16.1%	36 824	The overall applicant success rate has increased from 10.5% to 13.3%.
Other Male Prefer not to say	15.0% 10.5% 7.1%	3 554 18	Female applicants are more successful (16.1%) than male (10.5%) applicants.
Total success rate	13.3%	1435	

## **GENDER PAY**

Mean	15.3%	The gender pay gap is the percentage difference of
Median	11.1%	average pay between female and male colleagues.  This is different to equal pay, which compares the pay
This is snapshot data taker	n on 31 st March 2021, as	of female and male colleagues doing the same job.
reported in Gov.uk		

The gap is calculated in two ways; the mean average is the total of all salaries divided by the number of colleagues; the median average is the middle salary, when ordering them from lowest to highest.

We published our gender pay gap figures on gov.uk in March. Further details can be found on our website.

The main reason for our gap is due to the balance of male and female colleagues working at different levels; more male colleagues work in senior roles; more female colleagues than males work at lower graded roles. We are pleased to note that the mean percentage gap has reduced by 3.1% over the past year. The median has remained at 11.1%.

## **LEAVERS**

centage of female leavers is in line with the ty pool of female colleagues. The rate of male in line with the university pool of male colleagues

## **TRAINING**

Classroom courses prov	ided	301	The number of classroom courses (301) has increased
CLASSROOM BASED TRAINING			slightly during the reporting period as compared to last year (245) and this can be attributed to a greater
Female Male	66.1% 33.9%	2328 1193	number of colleagues returning to campus as Covid-19 restrictions have been lifted.
Total  ONLINE TRAINING		3521	There has been a decrease in the proportion of males attending classroom-based training by 6.5% since last year.
Male 47.6% 4		4553 4128 <b>8681</b>	There has been an increase in females attending classroom-based training by 6.5% since last year.
		The number of online training participants has decreased significantly since last year (11514) and this can be partly attributed to an increase in classroombased courses and partly due to a reduction in newly released mandatory online training such as the Covid-19 online recovery package and criminal finances which were introduced and completed by colleagues during 2020-21.	
			There has been an increase in the proportion of males attending online training by 4% since last year.
			There has been a decrease by 4% on females attending online training since last year

## **GRIEVANCE AND DISCIPLINARY**

The data for grievance and disciplinary shows
the number of cases reported by the protected
characteristic of the individual.

## **GRIEVANCE**

Female Male <b>Total</b>	50% 50%	2 2 <b>4</b>
DISCIPLINARY		
Male	85.7%	6
Female	14.3%	1
Total		7

Across the reporting period, 4 grievances were raised, and 7 disciplinary cases were conducted.

Of the grievances, 50% (2) were female and 50% (2) were male.

As for the conducted disciplinary cases, 85.7 % (6) were male and 14.3% (1) were female.

## **Sexual Orientation**

## **COLLEAGUE COMPOSITION**

Heterosexual	74.0%	2894
Prefer not to say	21.2%	830
LGB+	4.5%	176
Bi	2.0%	78
Gay man	1.3%	51
Gay woman/Lesbian	0.8%	33
Other	0.4%	14
Unknown	0.3%	12
Total		3912

The total disclosure for LGB+ colleagues has increased to 4.5% this year from 4.2% last year, and this remains above the UK benchmark of 3.5% (Advance HE Statistical Report 2021).

Heterosexual colleague disclosures remain the largest proportion and have increased by 4.4% from 69.6% last year to 74% this year.

The number of colleagues who prefer not to say has dropped by 2.2%, from 23.4% last year to 21.2% this year, indicating increased confidence in disclosing this information.

Information relating to gender reassignment is presented on page 12 of this report.

## RECRUITMENT

## **GRIEVANCE AND DISCIPLINARY**

The data for grievance and disciplinary shows
the number of cases reported by the protected
characteristic of the individual.

**Total** 

GRIEVANCE		
Prefer not to say	50%	2
Gay man	25%	1
Heterosexual	25%	1
Total		4
DISCIPLINARY		
Prefer not to say	57.1%	4
Heterosexual	42.9%	3

7

Across the reporting period, 4 grievances were raised, and 7 disciplinary cases were conducted.

Of the grievances, 25% (1) identified as heterosexual, 50% (2) preferred not to say, and 25% (1) identified as LGB+.

For the conducted disciplinary cases, 42.9% (3) colleagues identified as heterosexual, and 57.1% (4) preferred not to say.

## **Equality Impact Assessments**

## **EQUALITY IMPACT ASSESSMENTS (EIAS) WERE CONDUCTED OVER** THE REPORTING PERIOD OF 1<sup>ST</sup> APRIL 2021 - 31<sup>ST</sup> MARCH 2022

Over this period the University has continued with its transformational programme involving the merger of 7 Schools and Colleges into 3 Faculties. This process has provided the University with many opportunities to assess impact for equality and diversity and to embed considerations for advancing equality of opportunity into the evolving structures.

Alongside this, the University has adapted in response to the global Covid-19 pandemic. Equality Impact Assessments have also played a crucial role here, in evaluating the impact of the changes on colleagues protected characteristics and minimising any potential negative impacts.

Amongst those completed during the reporting period were Equality Impact Assessments on:

Research Excellence Framework, Reasonable Adjustment Policy, Animals on Campus Policy, Menopause Policy, Whistleblowing Policy, Zoom Telephony, USS Pension Changes, Senior Appointment Policy, Reaching Wider Programme Strategy, Parental Bereavement Guidelines, Staff Counselling Tender Process.

**Progress against the Strategic** Equality Plan April 2020-2024

The Strategic Equality Plan 2020-2024 can be viewed online. Progress made for period 1st April 2021 - 31st March 2022 is highlighted below.

#### IMPACT OF THE CORONAVIRUS PANDEMIC

We reviewed our SEP objectives in light of the coronavirus pandemic and the following action was taken to mitigate against any impact on under represented groups;

- Our Agile Policy was updated to allow more flexible and hybrid working to enable our colleagues to balance their work and personal commitments.
- Our health and wellbeing pages were updated with support and FAQs for colleagues who have been affected by the pandemic.
- Our promotions applications process took into account the effect of the pandemic on colleague's ability to meet promotion criteria and allowances made as a result.
- All training was moved to online platforms to ensure accessibility and support continued throughout the pandemic.
- All staff who were furloughed as a result of the pandemic were paid their salaries in full.
- Covid safe operating procedures were introduced and guidance provided to colleagues returning to campus. Risk assessments were carried out.

### **OUTCOME 1**

Ensure fairness in pay with regards to gender, ethnicity and disability, by reporting on and reducing the identified pay gaps.

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

Gender: To reduce the current mean gender pay gap by 2 percentage points by 2024.

#### **PROGRESS REPORT:**

During the reporting period the mean gender pay gap has reduced by 3.1 percent which means that this outcome has now been achieved in advance of the deadline. We will continue work to reduce the gap further.

Promote and improve a culture of dignity and respect for all by increasing awareness of reporting of bullying and harassment.

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

Colleagues and students demonstrate an increased awareness of policy in relation to Dignity at Work and Study.

## **PROGRESS REPORT:**

A review of the Dignity at Work and Study policy has commenced and is being reviewed by Human Resources and Academic Services in consultation with colleagues and students. This continues to be a work in progress.

We continue to promote the awareness of the Dignity at Work and Study policy via staff induction and all staff emails. We also conducted refresher training for all harassment advisors this year, as we incorporated whistleblowing as part of this role.

Colleagues and students report an increased confidence in the reporting of bullying and harassment

The University has signed up to the Victim Support Hate Crime charter to demonstrate and increase the visibility of our commitment to supporting those experiencing bullying and harassment. The University was awarded a Hate Crime Charter Trustmark, by Victim Support as recognition of our commitment to delivering on the actions contained within the Charter. We have delivered 5 training sessions on Hate Crime Awareness this year, working with Victim Support, and also marked Hate Crime Awareness Week in October 2021. This continues to be a work in progress.

As a University we also purchased a Report and Support system this year, to support students by making the reporting of bullying and harassment easier. Implementation of the system will follow and this will continue to be a work in progress until the system is utilised to its fullest potential.

## **OUTCOME 3**

An improved diversity of representation on university governance committees.

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

There is a 50/50 gender balance on Council University committees, where this has not been achieved so far.

Increase the percentage of Council members from an ethnic minority background to 10%, reflective of the local area.

#### **PROGRESS REPORT:**

All Council University committees now have access to and review the diversity of their members in advance of appointment processes. As at March 2022, University Council is gender balanced in relation to the University benchmark (56% female and 44% male).

All Council University committees now have access to and review the diversity of their members in advance of appointment processes. As at March 2022, University Council members from an ethnic minority background make up 11% of Council, reflective of the local area.

Attract and recruit diverse and quality leaders who fulfil our leadership values and behaviours.

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

## Over the 4 year period, for all PVC, Director and PVC Executive Deans, 50% of those appointed are female.

## **PROGRESS REPORT:**

During the reporting period females represented 44% of all PVC, Director and PVC Executive Deans and females represented 50% of the University Senior Leadership team. This continues to be a work in progress and opportunities to increase and maintain representation of women in leadership positions will continue to be taken.

Over the 4 year period, for all PVC, Director and Heads of Faculty roles, 15% of those appointed are from an ethnic minority background

During the reporting period there were no new appointments from an ethnic minority background for PVC, Director or Heads of Faculty roles. The University Senior Leadership team is not representative of our ethnic minority colleagues and this is being addressed as part of our Race Equality action plan.

Over the 4-year period to increase the percentage of LGBT+ Professors to 2.4%.

As at 31 st March 2022 3% of Professors identified as LGBT+. (Included in this group are Professors, Pro Vice Chancellors and the Vice Chancellor). This means that we have achieved our objective but we will still continue to progress work in this area.

## **OUTCOME 5**

To develop a diverse, high quality academic and professional services workforce.

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

Higher success rate of all applicants to academic promotions at all levels, specifically a higher success rate for female academic and academics from an ethnic minority background

## **PROGRESS REPORT:**

During the most recent promotion round (2021/2022), the success rate of female academics has increased 58% compared to 2015. The success rate of academics from an ethnic minority background has increased 67% compared to 2015. Overall there has been a 50% increase in successful applications compared to 2015. This continues to be a work in progress.

To attract and recruit a diverse high quality academic and professional services colleagues that share our ambition.

OBJECTIVES AND OVERALL SUCCESS MEASURE	PROGRESS REPORT:	
Numbers of female Professors increased to sector benchmark.	The percentage of female professors has increased during the reporting period to 26% (rising from 13% in 2014). We have not yet met the current sector benchmark (28%) and work in this area continues.	
To increase the success rate for applicants from an ethnic minority background at appointment, to make this comparable to white applicants.	The success rate for applicants from an ethnic minority background at appointment (7%) continues to be lower than white applicants (17.7%). We will continue our work in this area.	

## **OUTCOME 7**

Excelling achievement for students from all ethnic backgrounds

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

The degree awarding differential for students from an ethnic minority background is reduced

## **PROGRESS REPORT:**

Options for a student race awareness course are under consideration with a view to implementation in 2022/23. A multivariate analysis has been started on differential degree outcomes for students from ethnic minority groups which should report by July 2023.

Delivery of an innovative and collaborative CONNECT programme aimed at students to promote positive and healthy behaviours.

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

To embed wellbeing into the culture of our institutions. creating a connected community with trained colleagues and students ("Connectors"), enabling a shift to a whole university approach supporting mental health and wellbeing.

To establish a sustainable preventative model of delivery that is flexible and meets the differing needs of partner institutions, and, changes in student wellbeing needs over time.

#### **PROGRESS REPORT:**

Over 100 students and colleagues have been trained up as connectors. A wellbeing lounge has been developed in collaboration with the Student's Union and will be run by a lead volunteer mentored by staff in the University wellbeing team.

CONNECT (connect-wellbeing.wales)

## **OUTCOME 9**

Centenary curriculum commitment will be embedded by 2024

## **OBJECTIVES AND OVERALL SUCCESS MEASURE**

The six dimensions of the Centenary Curriculum will be embedded to the highest standard within all programmes to develop the Swansea Graduate.

## **PROGRESS REPORT:**

The Centenary curriculum commitment has been written into the Learning & Teaching strategy for the University. Disruption caused by the pandemic has meant that the rate of implementation across the University is variable as would be expected, however the outcome is on target.

Notes on the data presented: To allow for easy comparisons, this report follows a similar format to previous years. The majority of data covers the period of 1 April 2021 – 31 March 2022; where snapshot data has been used, this has been noted as at 31 March 2022. All benchmarking data is from the Advance HE Higher Education Statistical Report 2021 unless stated otherwise. We have aimed to be as detailed as possible in presenting the data, but where figures are low enough to identify individuals, we have grouped categories accordingly.
